

DETAILS

IIS-d Details

- Integrated GPIOs
- Local power supply
- Adjustable crosspoint

OPTIONS

IIS-d Options

- Average function
- Voice Mail
- Internet Interface (Skype)

QUESTIONS

We are happy to answer any further questions and provide more information on the various *IIS-d* options. Contact the project team on phone +49 (0) 53 51 - 525 650

IIS-d

INTELLIGENT INTERCOM SYSTEM - DIGITAL
INTERCOM AND CONFERENCE SYSTEM IN VOIP TECHNOLOGY

In the broadcasting corporations, OB vans as well as in theatres and similar establishments, a highly reliable communication system, which is easily adaptable to the respective situation, is necessary for the long-term management and observation of the operation.

The successful communication system IIS-a with analogue components and peripheral devices has now been further developed into *IIS-d*, a digital intercom and conference system in VoIP technology.

The use of open standards enables the gradual integration in available systems and infrastructures. Simple and economical!

IIS-d ist

- Modular designed
- Hierarchically structured
- Simple to use
- Can be continuously scaled (expandable)
- Without central matrix

SYSTEM

The intercom and conference system *IIS-d* is recommended with its control sections in desk, 19", table installation and special designs for professional operation.

- User-friendly
- Ergonomically designed
- Optimally adjustable to the working environment
- High quality and reliability
- Developed for 24/7 operation

INNOVATION

The innovation from *IIS-d* is the consistent use of open standards.

- The innovation from *IIS-d* is the consistent use of open standards.
- VoIP technology for audio transmission
- Industrial network infrastructure (Ethernet)
- TCP/IP protocol family
- Digital interfaces (PBX, 4-wire)
- Wireless LAN for mobile speaker interfaces
- Integration of smart phones and PDAs with Windows Mobile

CONFIGURATION

The system configuration and control is done using a web browser via the intranet.

- Independent of the hardware (PC, MAC, SUN)
- Independent of the operating system (Windows, Linux, MAC-OS)
- Integrated database
- Online configuration without restart
- Supervisor function

FUNCTIONS

The functions from *IIS-d* also include

- Direct call
- Group call
- Programmable call
- Answering function
- Conference
- Command monitoring
- Programme sound monitoring (IFB)
- Forwarding
- Hold
